These were the best two weeks of my life!

- Enon, Student

You made us realize that kids can do things that grown-ups can't do. Thank you so so much! We really appreciate it so much!

- Barbara, Student

Can we come to the camp on the weekend too?!

- Multiple Students

Such a well-rounded program is out of the norm. My child not only gained experience in academics such as science through experiments, but gained emotional/social maturity such as confidence and interest in going deeper on a topic.

- Georgeanna, Parent

Grounded in solid educational research, this innovative program will prepare children for success in the 21st century. It helps them be happier and more effective learners. It can change the way they think about themselves and their future.

- Dr. Pamela Garner, New Century College,
George Mason University

"Education is not the filling of a pail,
but the lighting of a fire."

- William Butler Yeats

SUMMER CAMP FOR

HANDS-ON SCIENCE FUN

SUMMER OF FUN LEARNING

- Immerse in real world exploration
- Take on identities of scientists, artists, inventors, and explorers
- Experience unique student-driven approach to science education
- Learn valuable life skills
- Journey around the world
- Outdoor learning and play
- Have fun and develop friendships

QUICK FACTS

Age: 6 – 8 and 9-12

Location: TBD, Reston, VA 20194

Summer Program: June 30 - August 8

Camp Hours: 9am - 3pm

Extended Hours: 8:30am - 9am, 3 - 5:30pm

Student to Teacher Ratio: 12-to-1 or less

CAMPS SCHEDULE

June 30 – July 11: Science Magic. Learn the physics, math and chemistry behind magic as you make things appear, disappear, levitate, and change colors. At the end of the session, perform your tricks in a science magic show!

July 14 – 25: Innovation Lab. Explore, experiment, question, plan, design and build structures, bridges, cities, animals, and creatures. Solve design challenges as you plan and create your own invention that can make life easier and improve your environment.

July 28 - Aug 8: Amazing Race Around the World. Journey around the world! We will give you all the tools you need for your trip: a passport, some foreign language and navigation skills! Young explorers will learn about people, science, cultures, architecture and world geography and experience music, cuisines, arts and traditions of people around the world. Even get a chance to build a country!

OUR APPROACH

Individuality and a belief in each child's unique talents are at the core of our strength-based STEAM SEL Approach (Science, Technology, Engineering, Arts, Math and Social and Emotional Life skills)

Experiential Learning

Our campers will be completely immersed in a variety of exciting real-life projects, where they could recognize and develop their natural strengths and talents.

Life Skills

Life Skills and Social and emotional learning develop self-awareness, build empathy and strengthen children's ability to manage their own emotions. These skills increase their likelihood of success in school and life.

Global Perspective (or Place-based?)

We introduce students to the world's cultural heritage through our program, international in its approach to people, knowledge, values and skills.
